- 320 clock reproducing circuit
- 322 memory circuit
- 324 data transmitting/receiving circuit
- 326 power supply circuit

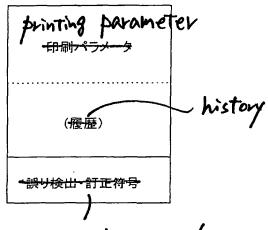

Fis. 7 【図7】 500 to scanner to print engine 530 532 to UI apparatus グラナー
夕選択 画像 -処理printing parameter (user) princing parameter (IC) to IC Chip 520 TF

- 認証・印刷プログラム50

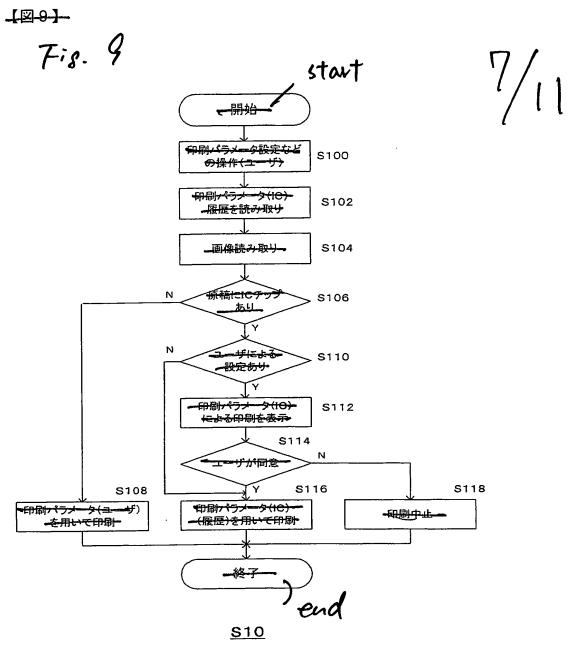

- 282 transmission/reception control circuit
- 284 transmission circuit
- 286 reception circuit
- 288 demodulation circuit
- 290 modulation circuit

- 500 image reading section
- 510 user interface section
- 520 data reading section
- 530 parameter selecting section
- 532 image processing section
- 540 printing control section

6/11

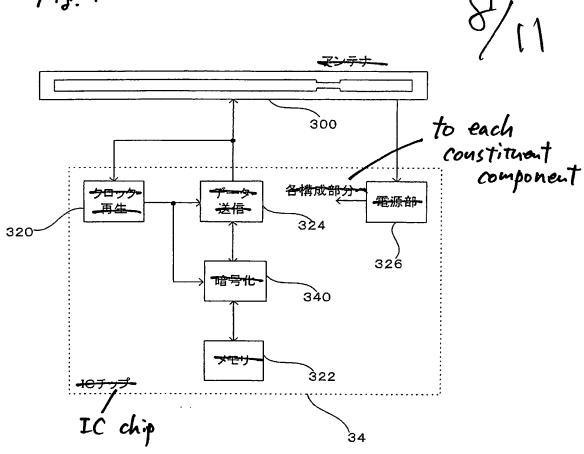

error detection/correction codes

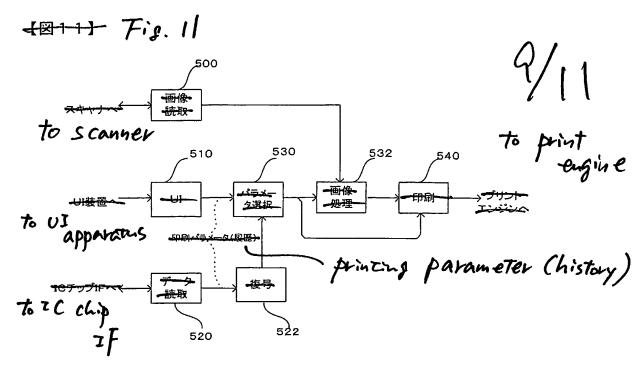

- S100 operation such as setting a printing parameter (user)
- S102 read a printing parameter (IC) and a history
- S104 read an image
- S106 does an original have an IC chip?
- S108 print by using the printing parameter (user)
- S110 is there a setting by a user?
- S112 display a printing condition according to the printing parameter (IC)
- S114 does the user accept?
- S116 print by using the printing parameter (IC) and (history)
- S118 stop printing

- 320 clock reproducing circuit
- 322 memory circuit
- 324 data transmitting/receiving circuit
- 326 power supply circuit
- 340 encryption circuit

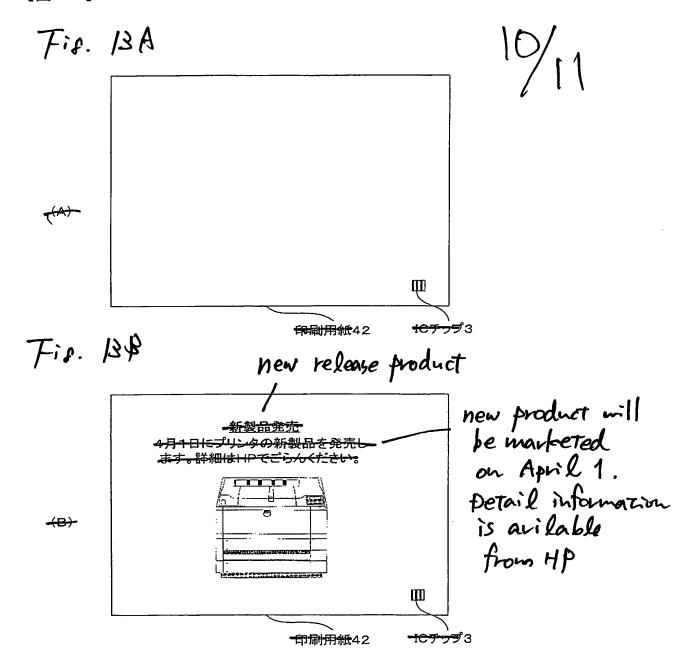

印刷プログラム52

18121 Fig. 12

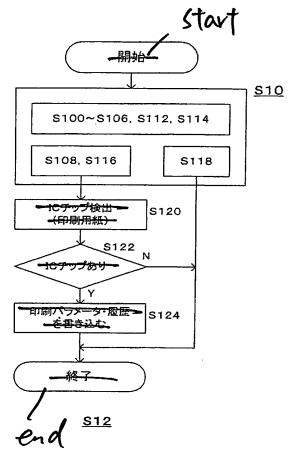

- 500 image reading section
- 510 user interface section
- 520 data reading section
- 522 decryption section
- 530 parameter selecting section
- 532 image processing section
- 540 printing control section

- 500 image reading section
- 510 user interface section
- 520 data reading section
- 524 data writing section
- 530 parameter selecting section
- 532 image processing section
- 540 printing control section

Fis. H

S120 detect an IC chip (printing paper)

S122 does the printing paper have the IC chip?

S124 write a printing parameter and a history
